Over 75 Years of Trusted Industrial Service

THE B&D INDUSTRIAL FAMILY

B&D INDUSTRIAL – RELIABILITY IN MOTION SINCE 1947

Founded by John D. Nations, B&D Industrial has been a trusted partner for industrial manufacturers for over 75 years—delivering uptime, precision, and performance. With nationwide reach and three specialized divisions, we provide end-to-end solutions including MRO distribution, electrical engineering, automation, gearing, and reliability services. From powering plants to keeping production lines turning, we keep industry moving.

INDUSTRIAL SERVICE

Our Gearing & Reliability team offers a complete approach to rotating equipment care—from emergency gearbox repairs to planned maintenance. With repair service centers and field service teams located around the US, we respond in hours, not days, to keep your operation running.

GEAR MANUFACTURING

We produce precision gears up to **AGMA 15** standards, including spur, helical, bevel, worm gears, and splined shafts. Whether large or small, we deliver high-quality gears built to perform in the most demanding applications.

MACHINING & FABRICATION

From prototypes to reverse-engineered parts, our machining and fabrication capabilities deliver precision and durability. We handle complex builds, specialty materials, and one-off solutions to get your equipment back online fast.

INDUSTRY-LEADING **SERVICES & SOLUTIONS**

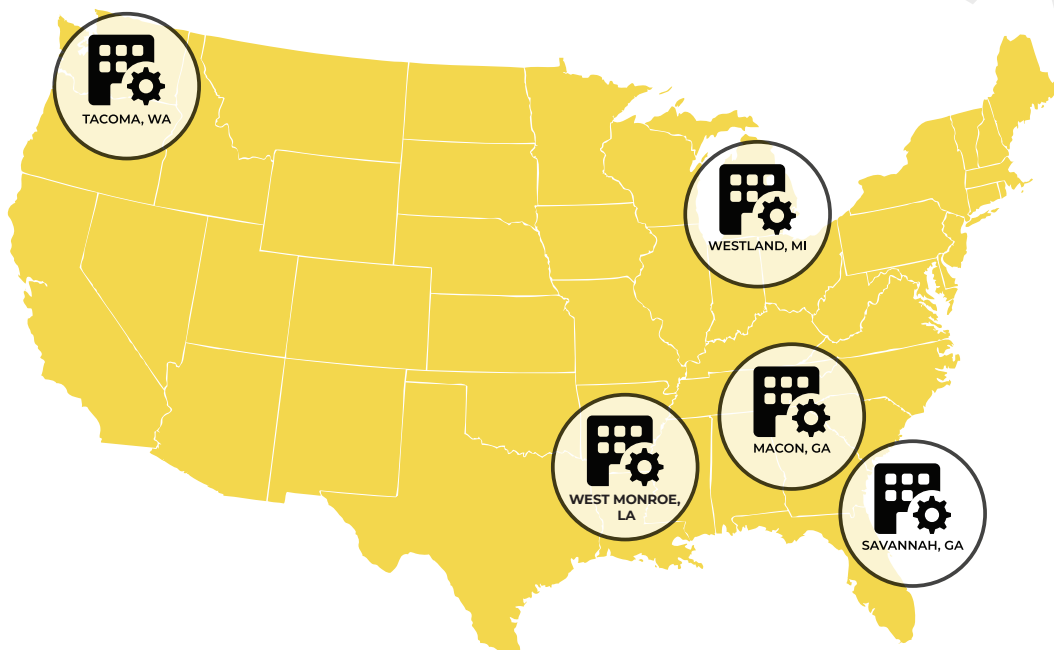

OUR SERVICES INCLUDE BUT NOT LIMITED TO:

- ✓ Gearbox repair and inspections
- ✓ Gear and bearing replacement and service
- ✓ Field service
- ✓ Engineering services
- ✓ Alignment services
- ✓ Equipment change-outs and inspections
- ✓ Providing surplus inventory and replacement parts

STRATEGICALLY LOCATED **SERVICE CENTERS**

With 5 service centers, we are prepared to be on the ground in hours, not days. Each service center is designed to handle overflow from its sister facilities in the event a branch is at capacity. This strategy enables us to ensure tight turnaround times without ever compromising the quality of our repair work.

GEARBOX SOLUTIONS

WORLD -CLASS EXPERTS

With decades of hands-on experience and innovative diagnostic tools, our team delivers the highest standards of quality and efficiency in gearbox solutions. From rebuilds to preventive maintenance and on-site machining, we keep your equipment—and your business—running at peak performance.

GEARBOX REPAIR & REBUILD

We restore gearboxes to like-new condition with precision machining, expert engineering, and stringent quality checks. Our end-to-end process ensures every component meets or exceeds OEM specifications, extending service life and reliability.

GEARBOX MAINTENANCE

Routine inspections, performance monitoring, and proactive part replacement keep your operations running smoothly. Our maintenance programs are designed to prevent costly downtime and maximize ROI.

INDUSTRIAL FIELD SERVICE & MACHINING

From urgent repairs to large-scale change-outs, our safety-certified crews deliver rapid, on-site solutions nationwide. Equipped with mobile machining capabilities, we solve problems in the field with the same precision as our shop—often in half the time of competitors.

GEARBOX REPAIR

Our skilled technicians specialize in on-site gearbox repairs, minimizing downtime with efficient, precise solutions.

GEARBOX REBUILD

When repair isn't enough, our gearbox rebuild process restores equipment to manufacturer standards with meticulous attention to detail.

GEARBOX REPLACEMENT

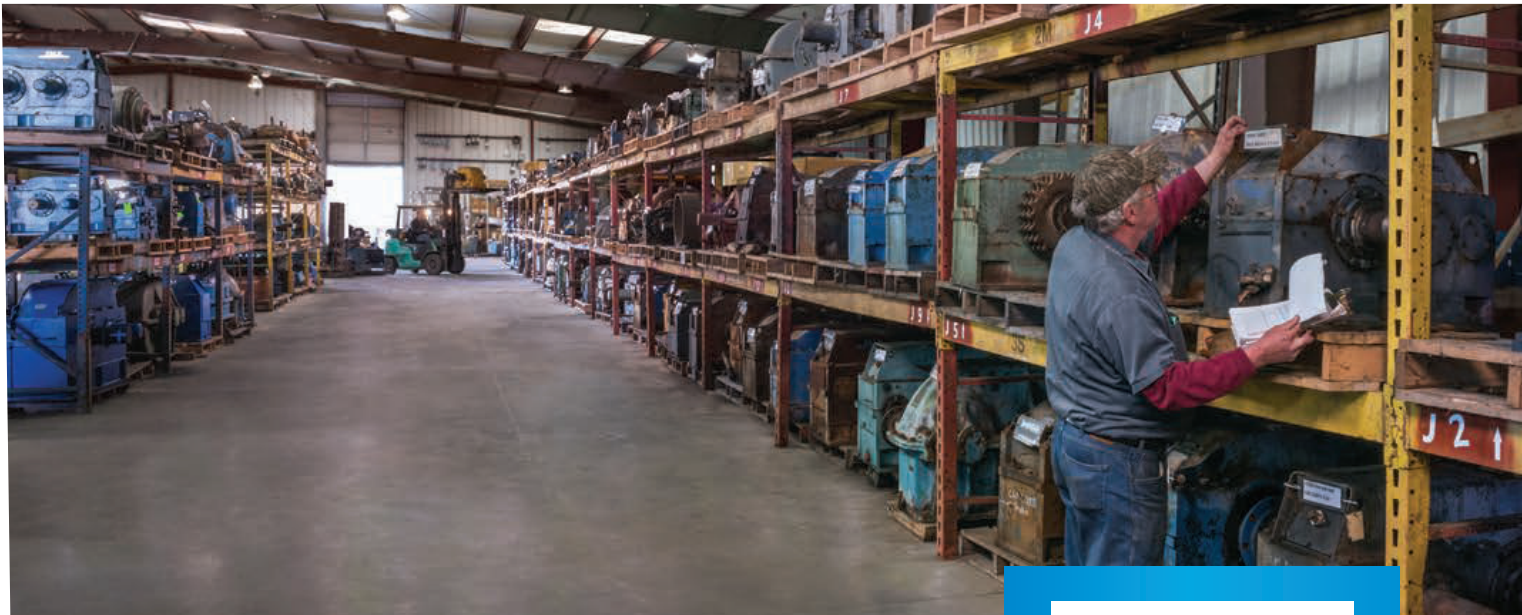

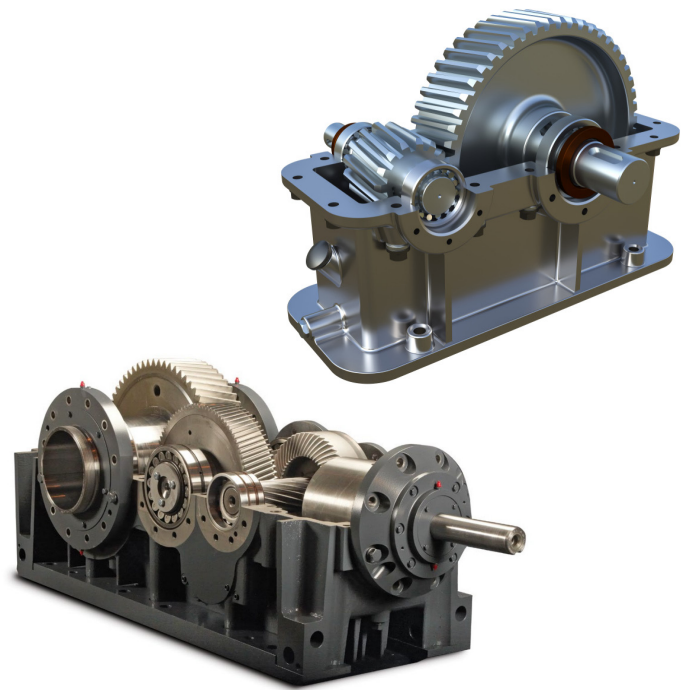

For replacements, we provide new gearboxes from premier vendors and, with our engineering and retrofit expertise, ensure the right spec for lasting performance.

NEW EQUIPMENT & PARTS

B&D Industrial partners with premier manufacturers to provide a full line of new gearboxes, motors, and rotating equipment. Our extensive vendor network allows us to supply reliable, high-performance products designed to maximize uptime and efficiency. From standard units to specialized solutions, we deliver the equipment you need—backed by expert support and the assurance of long-standing vendor relationships.

DIFFICULT-TO-SOURCE ***EQUIPMENT & PARTS***

B&D Industrial maintains a vast surplus inventory made up of hundreds of rare and discontinued gearboxes and parts. In industrial manufacturing, downtime is never an option—and when equipment failure threatens to halt production, our surplus stock has helped countless customers get back up and running fast. From emergency replacements to hard-to-find legacy components, B&D is the trusted partner that keeps plants moving when every minute counts.

GEAR MANUFACTURING

Gear Grinder

Precision Gears. Proven Solutions. Lasting Performance.

BUILT FOR PRECISION. BACKED BY EXPERIENCE.

As a leading gear manufacturer, we do more than cut gears to spec—we solve problems. Decades of real-world repair and service work have shown us how gears perform under extreme conditions, and we use that insight to help customers achieve peak machine performance. When a gear fails, we find the root cause, fix it, and prevent it from happening again. Every gear we produce meets the highest standards—up to **AGMA 15** quality.

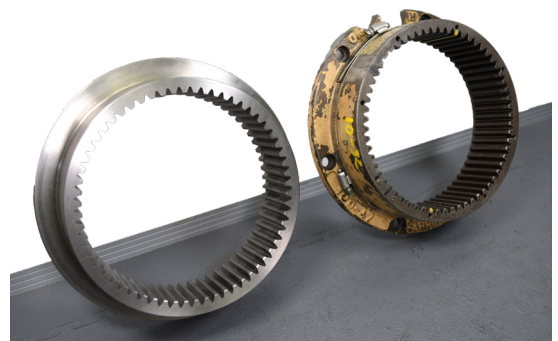

OUR GEAR CAPABILITIES

Spur • Helical • Bevel • Worm • Internal • Racks • Splined Shafts • Custom Profiles

ENGINEERING WITHOUT LIMITS

From reverse engineering worn parts to developing prototypes from scratch, our engineering team transforms challenges into precision-built solutions. Whether it's a single replacement shaft or a complex gear set, we deliver accuracy, durability, and performance you can trust.

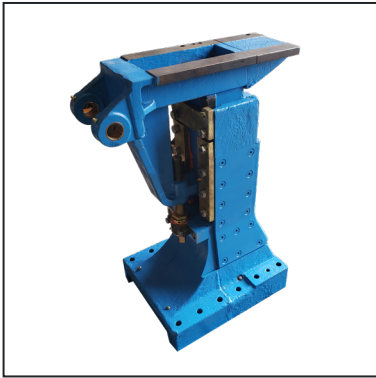

FABRICATION & MACHINING

FABRICATION – SOLVING PROBLEMS OTHERS CAN'T.

Our fabrication shop exists to solve the problems that stop production. When a part breaks and no replacement is available, we recreate it with precision and durability. Using advanced measuring tools, engineering expertise, and heavy-duty equipment, we reproduce obsolete parts, build custom tools for manufacturers, and perform specialized repairs—like removing worn blades and welding on new ones for large drill sets. Every project is aimed at extending service life, improving performance, and getting customers back online fast.

MACHINING – PRECISION FROM START TO FINISH

From raw material to finished component, our machining capabilities deliver accuracy and consistency. Our skilled technicians operate CNC machines, lathes, grinders, and specialty equipment to produce parts to exact tolerances. Whether it's a one-off replacement, a production run, or a complex geometry, every piece meets strict quality standards before leaving our shop—ready to perform under pressure.
