Pioneering Industrial Solutions Since 1947

SERVING INDUSTRY SINCE 1947

Since 1947, B&D Industrial has served as a trusted partner for American industry—providing the products, services, and solutions that keep essential operations moving. From our roots as Bearings & Drives, Inc. in Georgia, we've grown into a national provider of industrial distribution, gearing and reliability services, and engineered automation solutions.

What sets us apart is not what we do—but how we do it. B&D Industrial is built on three core pillars:

1 Proven Reliability

We earn trust through performance. Across thousands of installations and emergency calls, customers rely on B&D because we show up, follow through, and deliver results. Whether it's a gearbox rebuild that outlasts the OEM or a motor panel that keeps operations running during peak demand, our work proves itself in the field.

2 Pioneering Innovation

We don't chase trends—we lead with purpose. Our teams continually adopt and apply the best technologies and components on the market, not because they're new, but because they work better. From advanced motor control systems to custom gear solutions, we drive innovation that makes real operational impact.

3 Problem Solving

We do more than replace broken parts—we solve the root cause. Our engineers and field teams take the time to understand your systems, environment, and processes to develop solutions that are right the first time. It's not about selling product—it's about fixing problems with precision and long-term reliability.

Still headquartered in Macon, Georgia, and led by a third-generation leadership team, B&D Industrial remains committed to the same mission that started it all: creating opportunity and delivering value for families, businesses, and industries across the country.

“Whether you’re operating, down, improving, or expanding, B&D Industrial meets you at your stage—and supports what comes next.”

MRO & AUTOMATION SOLUTIONS

Our MRO & Automation Solutions division is the foundation of operational efficiency. With a network of distribution centers and engineering teams, we provide not only the highest-quality industrial components—but the knowledge to integrate them seamlessly. From bearings, motors, and power transmission to fully customized electrical panels and drive systems, we equip your operation to run smarter and longer.

GEARING & RELIABILITY SOLUTIONS

Heavy-duty equipment demands heavy-duty support. Our Gearing & Reliability Solutions division is a national leader in the repair, remanufacture, and custom design of industrial gearboxes and power transmission systems. From mining conveyors to chemical agitators, we keep mission-critical gear-driven equipment operating at peak performance.

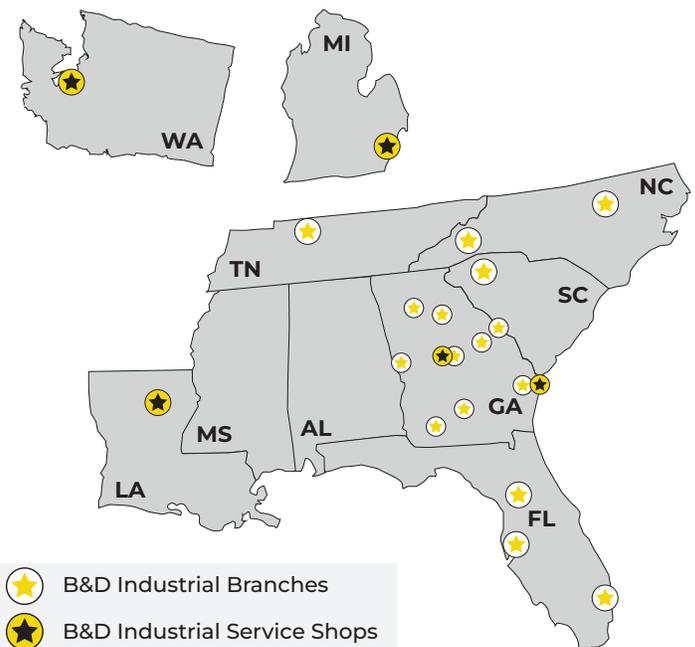

INDUSTRIAL FIELD SERVICES

When equipment goes down, your plant needs more than a part—you need experienced boots on the ground. B&D’s Industrial Field Services division brings trusted mechanical and electrical expertise directly to your site. From diagnostics and inspections to emergency repairs and scheduled maintenance, our team is equipped to handle issues quickly and correctly—minimizing downtime and maximizing uptime.

GEAR MANUFACTURING

B&D Industrial is one of the few service providers in the U.S. with in-house gear manufacturing capabilities, allowing us to deliver precision gears with speed, quality, and reliability. From single custom gears to complete drop-in assemblies, our team designs and produces solutions for even the most demanding industrial applications. Whether you need a replacement for an obsolete part or a fully customized gear set, we manufacture to exact specifications—keeping your equipment running and your operation on schedule.

BRANCH LOCATIONS

GENERAL MINING

In quarry and surface mining, uptime is everything. B&D Industrial supports your operation with a full spectrum of products, repair services, and field expertise designed to maximize productivity and minimize costly downtime. From pit to plant, we're your partner in operational reliability.

SERVICES WE PROVIDE

- Emergency gearbox repair and inspection
- Custom gear manufacturing and drop-in replacements
- Field troubleshooting and diagnostics
- Conveyor design and bulk material handling engineering
- Electric panel design, drive programming, and automation support
- Alignment, balancing, and mechanical rebuilds
- Inventory management and storeroom optimization

INDUSTRIAL PRODUCTS

- Bearings, housings, and power transmission components
- Gearboxes (new, surplus, custom-built)
- Conveyor components (pulleys, belts, screw conveyors, idlers)
- Motors, drives, and custom electric panels
- Lubrication systems and fluid power components
- Industrial controls and automation components
- Material handling systems
- Sensors, safety switches, and wiring

GENERAL ROCK QUARRY OPERATIONS

CONCRETE PRODUCTION

Concrete producers depend on precision, throughput, and durability. B&D Industrial delivers high-performance components and responsive services tailored to keep your batching and mixing operations moving reliably day after day.

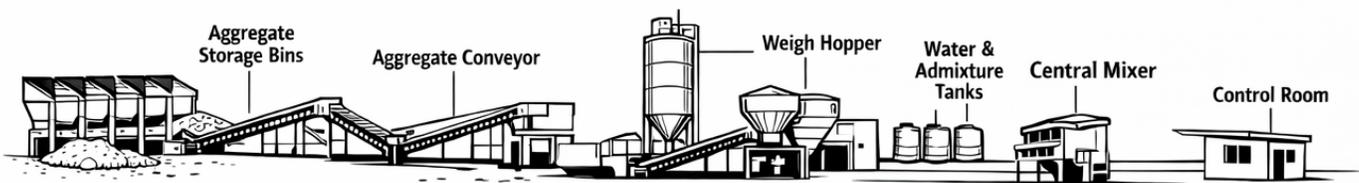

SERVICES WE PROVIDE

- Conveyor system design and support
- Gearbox repair and replacements
- Panel fabrication and drive programming
- Mechanical inspections and alignment
- On-site service and emergency troubleshooting
- Installation support and technical training

INDUSTRIAL PRODUCTS

- Screw conveyors and mixers
- Gear reducers and shaft-mounted drives
- Bearings and seals for harsh conditions
- Electric motors and custom control panels
- Conveyor and transfer system components
- Level sensors and automation controls
- Electrical drives and starters

CONCRETE PLANT OPERATIONS

ASPHALT PRODUCTION

High heat, abrasive materials, and nonstop production cycles make asphalt plants one of the toughest industrial environments. B&D Industrial provides rugged components and expert support to reduce unplanned shutdowns and keep production on schedule.

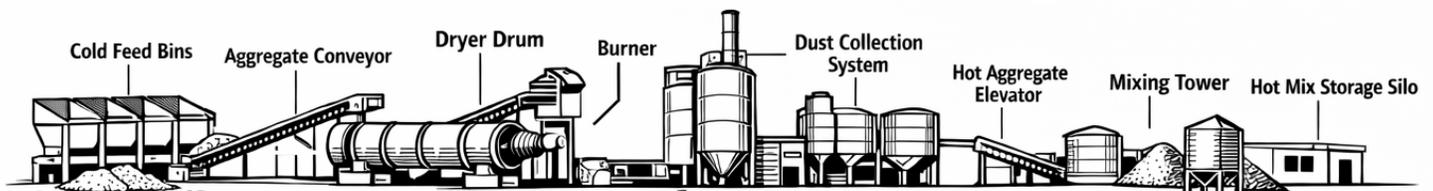

SERVICES WE PROVIDE

- Gearbox repair and custom retrofits
- Panel design and electrical integration
- Thermal and mechanical troubleshooting
- On-site mechanical repairs and service
- Conveyor system maintenance
- Motor service and electrical diagnostics

INDUSTRIAL PRODUCTS

- High-temp bearings and housings
- Drive motors and variable frequency drives (VFDs)
- Drag conveyors and bucket elevators
- Asphalt pump systems and couplings
- Burners, actuators, and temperature sensors
- Control panels and switchgear
- Gearboxes for mixers and aggregate feeders

ASPHALT PLANT OPERATIONS

FIELD SERVICES

When problems arise in production, you need a field team that acts fast and gets it right the first time. B&D Industrial's experienced field technicians bring deep mechanical and electrical expertise backed by one of the most complete repair and parts networks in the industry.

SERVICES WE PROVIDE

- Gearbox removal, repair, and reinstallation
- Shaft alignment and dynamic balancing
- Troubleshooting for drives, motors, and controls
- Conveyor repair and rebuilds
- Electrical field diagnostics and panel testing
- Custom machining and drop-in gear solutions
- Emergency response and scheduled maintenance

PREMIUM PRODUCTS

CONTACT US

Whether you're maintaining daily production or planning a system upgrade, B&D Industrial is ready to support your success. With decades of experience and a boots-on-the-ground mindset, our team delivers the solutions that keep your mining and aggregate operations running at full capacity. Contact us today to schedule a consultation or service visit.
